

# HIGH QUALITY

## Specifications,

Model : Jex series

Model : High pressure Jigger

Model : Semi-under Jigger

| Spec \ Model           | Jex series                                | High pressure Jigger            | Semi-under Jigger |
|------------------------|---|---------------------------------|-------------------|
| Material               | Nylon,N/C,T/C                             | Nylon,Acetate,<br>Polyester,T/C | Nylon,N/C,T/C     |
| Stainless steel        | SUS 304 or SUS 316L                       |                                 |                   |
| Batching diameter      | 700mm,800mm,1000mm (Standard)             |                                 |                   |
| Roll working width     | Max 4,000 mm                              |                                 |                   |
| Pressure               | Normal                                    | 0.39Mpa (Max)                   | Normal            |
| Temperature            | Up to 100°C                               | Up to 130°C                     | Up to 100°C       |
| Cloth speed            | 150m/min (Max)                            |                                 |                   |
| Driving motor          | 2.2kw , 3.7kw , 5.5kw                     |                                 |                   |
| Tension Control        | Inverter , Vector Inverter , servo system |                                 |                   |
| Expander               | Henriksen type or Sea-Saw type            |                                 |                   |
| Circulation System     | Optional                                  | ○                               | Optional          |
| Process control system | Optional                                  |                                 |                   |
